- Project Management Tools: Jira, Trello
- Object-oriented Programming
- Database Design
- Teamwork and Collaboration
- Problem Solving

WORK HISTORY

Software Engineer | Mentors' - 166, 1 Lake Circus
(Abed Dhali Road), Dhaka 1205

MENTORS'

06/2025 - Current

- Developing and maintaining modern web applications using scalable architecture
- Working with frontend and backend technologies to deliver user-focused features
- Collaborating with teams to improve product performance and usability
- Implementing best practices for code quality, debugging, and deployment

Software Developer | Aamra Infotainment Ltd - Safura Tower, 20 Kemal
Ataturk Avenue, Dhaka

aamra
the power of WE

03/2023 - 06/2025

- Improved software efficiency by troubleshooting and resolving coding issues.
- Enhanced user experience through designing and implementing user-friendly interfaces.
- Collaborated on stages of systems development lifecycle from requirement gathering to production releases.
- Collaborated with cross-functional teams to deliver high-quality products on tight deadlines.
- Built and maintained web applications with a focus on performance and scalability

EDUCATION

Uttara University - Holding 77 Beribadh Road, Dhaka 1230

12/2023

Bachelor of Science: Computer Science and Engineering

- Thesis Statement: Unsupervised Abstractive Bengali Text Summarization Using NLP
- Completed Coursework: Data Structures & Algorithms, Machine Learning, Database Management Systems, Web Development, Artificial Intelligence, Software Engineering
- Leadership Experience: Vice President, UU Programming Club, Sep 2022 to Aug 2023
- Peer Instructor for Internet Programming Course (One Semester): I was selected by my Internet Programming course lecturer the semester before last semester to teach my batchmates due to my proficiency in HTML, CSS, Bootstrap, React, PHP, and MySQL. I conducted two classes per week and the lecturer conducted one class.

RECENT PROJECTS

- **Mentors' Learning (Learning Management System)**

I work as a Full-Stack Software Engineer on an LMS, where I develop core features, build scalable frontend interfaces, and create backend APIs to support course management and user functionality.

Technology: *Laravel, NEXT.js, MySQL*

- **Mentors' ERP**

I also contribute to an ERP system as a Full-Stack Software Engineer, where I build business modules, develop dashboards, and integrate backend services to support efficient business operations.

Technology: *Laravel, MySQL*

- **Comprehensive Software for BAFFA (Bangladesh Freight Forwarders Association)**

BAFFA benefited from this software through improved operational efficiency, reduced manual workload, and enhanced data accuracy. The integrated system streamlined key processes such as HR and payroll, arbitration, event management, leave, asset, and inventory management.

Technology: *Laravel, Vue.js, MySQL*

- **Ticketing System Software for iBAS**

I developed a Ticket Management Software for iBAS Bangladesh Government, allowing government employees to create tickets for issues, which are resolved by support engineers. Admins have full visibility, monitoring the entire process to ensure efficient issue resolution.

Technology: *Laravel, MySQL*

- **Service Management Software for Aamra Technologies Ltd**

I developed a Service Management Software featuring live engineer tracking with geolocation, and admin, engineer, customer, and product management. It streamlines workflows, enhances communication, and improves service efficiency by providing real-time updates and centralized management of service operations.

Technology: *Laravel, React.js, MySQL*
